Austria's largest conference facility is one of the global players in the meetings industry. Opened in 1987, the ACV can accommodate some 9.500 delegates, seated in 17 lecture rooms (100 – 4.200 theatre style) and 170 small meeting rooms and offices (22 – 165 m<sup>2</sup>) on four levels. Four purpose-built exhibition halls (12.000 m<sup>2</sup>) and another 10.000 m<sup>2</sup> of foyer areas complete the ACV conception of space. As from 2003, the ACV has undergone a stepwise refurbishment: heavy wooden panels gave way to bright white walls with contemporary pieces of arts, airy reception & registration counters and inviting foyer bars. Meeting an innovative catering concept, the traditional restaurant has been turned into another multipurpose lot and replaced by 9 foyer restaurants. The catering units can always be built wherever the client wants them, within the areas rented. For after-congress parties a location out of the ordinary for 500 people is offered: the A/C boiler room...

It goes without saying that the ACV boasts of ultra-modern telecommunications, a comprehensive IT network throughout the premises, WLAN and top-quality conference equipment, supported by reliable suppliers, including exhibition management and stand-building.

On top, a dedicated and highly professional on-site team with fifteen years of experience is ready to assist organizers and clients to make their meetings and events a perfect success.
