Business as *Unusual*

Further education should be fun and take place in an appealing atmosphere. Create learning targets easy to reach.

The Right Location - The Right Success!

A multifunctional, 2.500m² large seminar and event venue, holding up to 2.000, people has shone since the beginning of 2006 in the alpine-town of Saalfelden.

As well as modern architecture, a great deal of resources was put into connecting the surrounding landscape and the impressive mountain scenery with this building in Saalfeldens city centre. A highlight of the building is a spacious seminar venue built of glass, which offers a perfect view to the wide valley basin. You will be fascinated!

The centre boasts 11 event & seminar rooms, which can hold up to 1000 persons – all rooms receive natural daylight and are fully air-conditioned. Out on the 14 meter high exposed terrace (400m²), looking across the rooftops of this small city, you can hold seminar breaks as well as enjoy the perfect spot to chill out in the evening. Of course the in-house technical equipment meets the latest standards and technical fittings (e.g. driveable stage, DMX lighting controls, W-Lan, UMTS broadband, hanging points...).

One of the key business objectives is the automotive business. The Congress Saalfelden is situated in the middle of a various range of spectacular mountain passes. The most famous Alp-Mountain-Pass -the Grossglockner High Alpine Road is only 20 km far from Saalfelden. It is a special nature and driving experience for everybody. But not only the landscape is a paradise for drivers, also the Driving Experience Centre for fun and security events direct in Saalfelden meets all wishes.
